## Grandaddy, El Caminos In The West

Doo doo doo

So there's my baby Laughing at me in the sun Wonder if I'm the weaker one I feel so far away from home Always so far away

The Pacific will pacify us when we're done If only we weren't always spun I feel so far away from home Always so far away

From El Caminos in the west All collapsed and futureless I'll paint the words a simple wish For peace of mind and happiness El Caminos in the west We're all collapsed and futureless I'll paint the words a simple wish For peace of mind and happiness

Doo doo doo

Here comes the chaos Perfectly on time again Is it ever gonna end I feel so far away from home Always so far away

The demolition still can be a lot of fun Someone should tell me that I'm done I feel so far away from home Always so far away

From El Caminos in the west All collapsed and futureless I'll paint the words a simple wish For peace of mind and happiness El Caminos in the west We're all collapsed and futureless I'll paint the words a simple wish For peace of mind and happiness
