

Granddaddy, Fare Thee Not Well Mutineer

High rise carcasses left behind
For far away places you'll never find
Chrome-lined smoke clouds left behind
For far away places inside your mind
Inside your mind
Board the jackass enterprise
Watch the road for broke down satellites
Fare thee not well mutineer
Don't come back around
Fare thee not well mutineer
Should you all crash down
Should you all crash down
The grass was always greener
The grass was always greener

The dead malls are all over town
Airports are apartments now
And amusement parks by the ocean
That's where you'll find the launchpad
And the carnies and NASA university grads
University grads
Board the jackass enterprise
Watch the road for broke down satellites
Fare thee not well mutineer
Don't come back around
Fare thee not well mutineer
Should you all crash down
Should you all crash down
The grass was always greener
The grass was always greener
