One...

Two...

Three...

Four...

Tamn the tones

And test the tones

That pre-amp does

Impass the lomes

Continuing the input please

Dial in the gates release

Reverse phase and reverb plates

Will give the instrument some space

Earphone monitor fatigue

Green compression from Jonique

I sound as though I know my stuff

And sure I guess I know enough

But I'm just a dork

And can't really record

I'm sorry I won't say no more

Except for

I don't want to record anymore
