Great White, Lady Red Light

(Kendall, Russell, Niven, Lardie) Deep in the night, alone in the dark I get a need for you In a hotel room I remember the way how we do what we do Too long without your touch Too long without your love My lady of lights I'm coming over for you I call you lover I call you friend but when I need another she's got a heart a heart to lend Lady Red Light, rock me tonight Baby's got a way to make it alright Lady Red Light, rock me tonight She really knows how to move me my Lady Red Light A shadow of night waiting in time Really no need to be cold and alone I've made up my mind who I need to see I call you lover I call you friend but when I need another she's got a heart a heart to lend Lady Red Light She knows how to move me
