

# Gromee, All Night (ft. WurlD)

There's a mirror in the sky  
Shining down on me  
See my reflection rising high  
Whit every progress I've made

I've been so many amazing places on my way  
But there's nothing like the way the Music takes me high

I don't want your trouble  
Just a lover and friend  
Let the music and the moment take us high

Let the music play all night, all night  
Keep the rhythm on all night, all night  
/5x

Superstition controls the mind  
Until you find yourself  
Do you believe it?  
That you and I we're born to die for love

I've been so many amazing places on my way  
But there's nothing like the way the Music takes me high

I don't want your trouble  
Just a lover and friend  
Let the music and the moment take us high

Let the music play all night, all night  
Keep the rhythm on all night, all night  
/5x
