

Guided By Voices, Never Forget Where You Get

Never Forget Where You Get Them
We remind you
Always behind you
Watching closely the lovers
Never repeat where you found them
Blind sighted you
Ignited you
To do a new world image make-over
Never forget where you got it
They have spared you
But they don't care for you
Close-ups mingle, all wrinkled

Never forget where you get them
'Cus if you forget it
You will regret it
And don't forget who said it, now

So never forget where you get them
When there are oceans heavy on your mind
Round up your things and see what you find
Let go the coats and leave them behind
