

# Handsome Poets, Sky on fire

Wheels keep rolling  
Sirens howling in the desert  
In the desert  
You're on the backseat of my car  
in a dream we're gonna watch the stars  
In a new place, in a new place

We lost track, it doesn't matter  
cause we are on this road together

Let's start a fire, a fire  
new kids coming into town  
lets get together  
we take over now

A fire, a fire  
new kids coming into town  
lets get together  
we take over now

Stakes were high, the rise and fall  
no more lies, leave it all  
in the desert, in the desert  
Change the world, paint the place  
bring a toast to peace and grace  
in a new place, in a new place

We lost track, it doesn't matter  
cause we are on this road together

Let's start a fire, a fire  
new kids coming into town  
lets get together  
we take over now

A fire, a fire  
new kids coming into town  
lets get together  
we take over now

We are on this road together  
We are on this road together  
We are on this road together  
We are on this road together

Let's start a fire, a fire  
new kids coming into town  
lets get together  
we take over now

A fire, a fire  
new kids coming into town  
lets get together  
we take over now

A fire, a fire  
new kids coming into town  
lets get together  
we take over now
