## Hawthorne Heights, Until Her Heart Stops

I remember that time All through the night Trying not to close my eyes Again

Pretending that all he got was In a stolen car Trying not to pull over And cry

My eyes so red I just want to die Kill me with your words Kill me one last time

Cut out my heart And throw it on the floor For everyone to see

Remember you said "Kiss me sweetheart before you go again."

Remember you said "Kiss me sweetheart before you go again."

Don't say It's over This time

Don't say It's over This time

She's waiting on the inside For me to call again Waiting for her Just to say goodbye One last time Waiting on the inside

I'm supposed to say Anything at all To make you want me back

If I had three wishes I wish them all on you I wish you away From meeeee

Supposed to say anything at all

She's waiting on the inside For me to call again Waiting for her Just to say goodbye
