

# Hearts Of Black Science, Walking With The Sun

We should have wasted our years  
on living like we've learned  
Hold my broken hand  
The future looks so bright

All the velvet tears you cried  
Holding back, back the time  
Dark shadows in the sea  
Swimming after me

Closing, closing in on you  
drift into nowhere  
on the run staring at the sun  
Closing, every time I hear your name  
my heart starts to beat

Night on fire walk with me  
Hold me tight endlessly  
Gaze up to the sky  
Don't look back  
Time to die

Closing, closing in on you  
drift into nowhere  
on the run staring at the sun  
Closing, every time I hear your name  
my heart starts to beat

Closing in on you  
drift into nowhere  
on the run staring at the sun  
Closing, every time I hear your name  
my heart starts to beat
