

Heathen Foray, Inner Force

Another year, Another time of struggle
You went with us through all the highs and lows you can imagine
Another year, another time of real big fights
Standing on stages only for you my dearest friends

Sometimes it looked like we will lose the fight
We put in this hard work our sweat and tears and blood
Sometimes it looked like we won't make it anymore
Every time we got smashed on the ground you straightend us up

You know this longing deep inside
You know this feelings you can't hide
This are the reasons for our fights
We will forever stand our ground
Through the music we are bound
Nothing will stop us we'll rather die

We hear this call out there
Noway to ignore this yearn
There is this inner force
Pushing us right to the top
Till the end we will stand up for sure
Chasing our dreams for you
Till the end we we will fight
No one can this deny!

This time we're going right to the edge
With full force and we wont need sleep or rest
This time we're going right to our limits
And again we need your help to give our best
