

# Heavenly, Carpe Diem

Don't be afraid  
Come cross the line  
Sliding your hands below  
I can't wait  
Take my body close  
I got something waiting for you

I am still ready  
I am still fired up  
Show me the way you move on  
Sharing the night together oh baby  
Take the lead and here we go

Staying in weightness honey  
As long as endless story  
Tell me now what's in your head  
Tell me what you prefer  
Slowly or faster

Making love over and over  
Tasting new pleasures again  
Life is short so going ahead  
You won't regret that!

Let desires out of control  
Enjoy the chances of living  
Take it now and forever more

Let all your troubles go  
Clinging to the joy of living  
Take it now and forever more
