## Helloween, Save Us

Too late to call for the priest He is not here anymore We look at the age of the beast and we've seen its vast armies forms Hear our call

Please, save us Please, save us

In permanent madness we live no time for life and for love To take is the rule, not to give Insanity commes from below To take us all

Please, save us Please, save us

We belive that the phenomena of nature Are the expression of infinite inteligence we express our belief that all forms of life are manifestations of spirit Ans thus, all man are childrens of God

Far from down belowour comes, prepare to take us all Waiting for his future and the final call

We stand in the edge of the world just one step more and we fall Guide us and please take our hands without you we will came along

Please, save us
Please, save us. Now!
Save us--from the gods of thunder
Save us--from the dogs of war
Save us--from the creeping nightmares
Save us--from the evil's course
Save us--from our own ignorance
Save us--from the man in black
Save us--from the desolation
Save us--from the hate attack
Save us--oh please
Save us--oh please
Save us--now!
