

Hey, I Don't Know

i don't know many things
physics math and chemistry
i don't know many tricks
how to kill and not to speak
i don't know
if i could even find my way home
i don't care for attitudes
all i know happiness ain't here
i will soon bear you my soul
my life's out of my mind control
now it's time to say all
i don't want you anymore
life is no stranger to you and i
maybe it's good for your sense of surprise
take it like a gift
and try to break down
maybe these are windows into our lives
i don't know many things
physics math and chemistry
i don't know many tricks
how to love without pain
life is no stranger...
