====English====

</lyrics>

BLACK HOLE The burning gun muzzle, the scent of gun powder
BLACK HOLE The cold monitor, the enemy's silhouette
The REAL battlefield, gripping the sweat covered trigger
The REAL battlefield, the cross-hairs over the target

Kill or be killed, two choices but one
I have no words to leave behind, I am a SOLDIER

Hckebein Personal Trooper
Steel Soldier
The life I risked on you
Beyond this blood that spills
I believe that there is rest
Now, while in the line of fire
I forget my tears and fight

BLACK HOLE There's no escaping
BLACK HOLE This reality
Then I'll stand up to it
Hckebein, along with you

Live and live and live through
Until the day
I can return to the arms of the one I love

BLACK HOLE The clash of glimmering blades
BLACK HOLE The shattering armor, the flying sparks
The REAL battlefield, sinking into the cockpit
The REAL battlefield, listening to the songs of the Grim Reapers

Will it be me tomorrow, I wonder as I live through today
I threw away yesterday, I am a SOLDIER

Hckebein Personal Trooper
Machine Soldier
You don't say a thing
The silhouette stained by the sunset
Will it be my gravestone someday
The blurred sky, within this dark twilight
Drive your thoughts to those that are gone

BLACK HOLE Even screams disappear
BLACK HOLE Tears dry up
Now I close my eyes
Hckebein, within you

Live and live and live on
Until the day
I reach the utopia that my friend and I dreamt of

BLACK HOLE There's no escaping
BLACK HOLE This reality
Then I'll stand up to it
Hckebein, along with you

Live and live and live through
Until the day
I can return to the arms of the one I love
