Informatik, The World Belongs To Us

Look around
At the world today
Our precious home
Withers in decay
what once was ours
is now torn and stayed
we wondered how
it got this way

Years will come Years will go kingdoms rise and fall the time has to take control the world belongs to us

the years will come the years will go kingdoms rise and fall the time has come to take control the world belongs to us

Long ago a choice was made the human rules the rest obey now we are taught how to behave don't question why and don't complain

the world belongs to us...

Years will come Years will go kingdoms rise and fall the time has to take control the world belongs to us

a single drop of water becomes a mighty fall People of the Earth The world belongs to us

now its time
to demonstrate
that you and I
can make history
tear down the walls
that separate
to make us weak
and keep us afraid

years will come years will go kingdoms rise and fall the time has to take control the world belongs to us

a single drop of water becomes a mighty fall people of the earth the world belongs to us

years will come

years will go kingdoms rise and fall the time has to take control the world belongs to us

a single drop of water becomes a mighty fall people of the earth the world belongs to us
