

Iron Maiden, Speed Of Light

Another time another praise
a hollow universe in space

I took a trip to see the sites
that will be black over a night

One way ticket now returned
my shooting stars are vastly burnt
on the edge that we can't see

I've shot the moon you're on me
Another take you love you'll see
A just to loose some galaxy

Shadows in the stands
We will not return
Humanity will save us
At the speed of light

Shadows in the stands
We will not return
Humanity will save us
We're slipping through the night

I'll say a mass for you and wave
Shooting plasma from my grave

Event horizon lost in space
Running in a human race

I don't know where I don't know why
But somehow back in time again
I'm on the edge you can't see

Another take your love at night
A single party call on me
You won't be tracking me by sight

Shadows in the stands
We will not return
Humanity will save us
At the speed of light

Shadows in the stands
We will not return
Humanity will save us
We're slipping through the night

Shadows in the stands
We will not return
Humanity will save us
At the speed of light

Shadows in the stands
We will not return
Humanity will save us
At the speed of light

Shadows in the stands
We will not return
Humanity will save us
At the speed of light

Shadows in the stands

We will not return
Humanity will save us
At the speed of light

We're slipping through the night
