

# Iron Savior, Fistraiser

Iron fists are pumping  
The beat is driving hard  
Cutting like a razor  
They're riffing down the chords  
Sweat is dripping on the floor  
In the gleaming light  
The beast is breathing fire  
Thunder strikes the night

Living for the moment  
Living for the day  
Don't care for tomorrow  
Don't care what they say  
Raise your glasses high

And keep that fire burning  
Keep the amber hot  
Never lose the thunder  
Never stop to rock  
Raise your fist  
And set your spirit free  
Heavy metal  
Is our chosen way to be

Furious, going wild  
Rocking to the beat  
Soaking up the energy  
The power and the heat

This is the medicine  
The one and only cure  
No flavours added  
It's sheer and pure  
So if you're feeling ill  
Just take the pill

And keep that fire burning  
Keep the amber hot  
Never lose the thunder  
Never stop to rock  
Raise your fist  
And set your spirit free  
Heavy metal is our deal

[Solo Piesel / Piet]

Out there is a shadow  
Lurking in the dark  
Creeping up unseen  
Straight in your heart  
Take heed - when indifference  
Is trying to take your soul  
Turn on the music  
And get back in control

This is the drug  
The one and only cure  
No flavours added  
Sheer and pure  
Raise your glasses high

And keep that fire burning - OH OH OH  
And keep the amber hot - OH OH OH  
No, never lose your thunder - OH OH OH

Come on and raise your fist  
Bang your head

And keep that fire burning  
Keep the amber hot  
Never lose your thunder  
Never stop to rock  
Raise your fist  
And set your spirit free  
Shout it out  
Loud and proud  
Heavy metal  
Is our chosen way to be
