Jade Valerie, Always Mine

It's good to see you happy It's good to see you strong It's good that things are different, baby It's good that we were wrong

You finally found another We're finally moving on But a part of you thats only mine In my heart is living strong

Only mine Always mine Only mine Always mine At the other end of time Not Goodbye just behind us

Only mine Always mine Always mine At the other end of time Not Goodbye just behind us Dadadadada

They say that time's a healer But some waters run to deep Theres a part of you that I let go And a part of you I keep

My lover and a stranger A place I used to live The part of me that learned to love But it's learning to forgive

Only mine Always mine Only mine Always mine At the other end of time Not Goodbye just behind us

Only mine Always mine Only mine Always mine At the other end of time Not Goodbye just behind us Dadadadada

At the other end of time Before we said goodbye At the other end of time Before we learned to lie At the other end of time Those day will never die The other side of you That only meant to live Thats only meant for me

I dont wanna know Dont need to know Who cares about right now I dont wanna go Dont need to show Dont care about right now

Only mine Always mine Only mine Always mine At the other end of time Not Goodbye just behind us

Only mine Always mine Only mine Always mine At the other end of time Not Goodbye just behind us
