Janis Joplin, Light Is Faster Than Sound

Light is faster than sound My head to the ground Mind going round Faster than sound.

What goes up must go down World goes around Sun shines around Faster than sound.

Suddenly I see your face
Faster than sound
Through the emptiness of space.
Faster than sound
Youre turning my mind all around
Faster than sound
Cause life is faster than sound.
Faster than sound
Faster than sound
Faster than sound

Light is faster than sound My head to the ground Mind going round Faster than sound.

What goes up must go down World goes around Sun shines around Faster than sound.

Whoa, suddenly I see your face Faster than sound Through the emptiness of space. Faster than sound Youre turning my mind all around, Faster than sound Cause life is faster than sound Faster than sound Faster than sound
