## Jasmine Trias, What U Do To Me

[Hook:]

Baby what you do to me

I don't know but it feels so sweet

I can't hardly stand it

So I demand that you save your love for me

Baby it's a vacancy when you're gone

There's a missing piece

I can't hardly stand it so I demand (it)

That you save your love for me

[Verse 1:]

Baby, I can't hardly wait until you call me

I anticipate it all day I crave it

Just to hear your voice

'Cuz if I don't hear from you

All day I'll be feeling blue

Checked my phone 1000 x's to see

If your number came through

[Hook:]

Baby what you do to me

I don't know but it feels so sweet

And I can't hardly stand it

So I demand that you save your love for me

(Save it all)

Baby it's a vacancy when you're gone

There's a missing piece

I can't hardly stand it so I demand (it)

That you save your love for me

[Verse 2:]

It's crazy

You're just like my favorite song I sing

You're my melody in perfect key

That's why you're a good look for me

Now I don't want to be infatuated

But the feeling I can not contain it

When I think of how far we'll go

Makes me wanna love you more

[Hook:]

Baby what you do to me

(whatever you do to me)

I don't know but it feels so sweet

And I can't hardly stand it

So I demand that you save your love for me

(Save your love for me)

Baby it's a vacancy when you're gone (Vacancy)

There's a missing piece

I can't hardly stand it so I demand (it)

That you save your love for me

[Bridge:]

I don't wanna come off to strong

But I think you got me so gone

I'll come running every time you call

'Cuz now I want you all to myself

Time and everything else

I gotta be selfish

Save it all for me

[Hook:]

Baby what you do to me

I don't know but it feels so sweet

(Cuz I don't know)

And I can't hardly stand it

So I demand that you save your love for me

(Save your love for me)

Baby it's a vcancy when you're gone

(When you're gone boy I can't sleep)

There's a missing piece I can't hardly stand it so I demand (it) (No no no no oh) That you save your love for me [x2]
