

Jennifer Lopez, The One,

you doe do love?
You do love
Joe you do love

Jenny ha ha
We all do it like

taking away
the fact that i care about you
it's just your way
so sweet
everything seems right around you
did you know
that you, had this calming way about you
in your touch....
and i wanna know if i could be your girl

[chorus]
you are everything
and everything is you
you are everything
and everything is you
oh you are everything
and everything is you
you are everything
and everything is you

i'm happy to say
in a lot of ways you've changed me
makes me smile
when you said you were glad the day you found me
i'm wishing away
any harm that might ever find you
heaven knows...
i really feel
i'll always be you girl

[chorus]
you are everything
and everything is you
you are everything
and everything is you
oh you are everything
and everything is you
you are everything
and everything is you
