

# Jennifer Lopez, This Is Me...Now

Tekst piosenki 'This Is Me...Now' z albumu 'This Is Me...Now' od Jennifer Lopez (premiera 16 lutego)

I watched my mother  
Miss out on her life  
All those could-have-beens became her sacrifice  
But here in the darkness  
It's not the future nor the past  
And 'cause it's meant to be with you boy it will last

You met me halfway  
Growing pains, broke some chains in every chapter  
Now we know what it takes for our ever after  
Took some lefts now we're right here where we are  
And I sing

This is me now  
This is me now  
And I took my time  
Lot of winters summers baby  
Had to heal my heart  
But I love who I am lately  
This is me now

When I was a girl they'd ask me what I'd be (Whatchu gonna be?)  
A woman in love is what I grew up wanting to be (In love's what I wanted to be)  
It's my melody, the symphony I sing (Sing)  
And your every word gave me strength to follow my dreams (Yes you did)

You met me halfway  
Face to face, tell the truth, no holding back (No holding back)  
We put in work, overcame all the disasters (All the disasters)  
Time apart brought us right right here where we are (where we're meant to be)  
And I sing (And I sing)

This is me now (Love me as I am)  
This is me now (This is me now)  
And I took my time (And I took my time)  
Lot of winters summers baby  
Had to heal my heart (My heart)  
But I love who I am lately (I do it for myself)  
This is me now

Had a lot to learn  
Had a lot to grow  
How to find my way, yeah

Take me as I am (And you)  
And I'll take you as you are (And I)  
And we'll build this life together  
I found my shooting star  
The double the shine  
The greener the diamond  
One of a kind  
The clearer the timing  
Ain't nothing change  
You know paps goin' crazy  
Beep beep, pull up in a black Bugazzi  
Baby got a love that'll last forever  
Old tingz, new tings, it's a new level  
All gas, no brakes, you could come rev it  
Baby you know when you want me

I'm ready, I'm ready, I'm ready  
This is me now

This is me now
