

Joanna, Ultraviolet

(And the world goes round and round
and life goes up and down)
He is a wave and he's breaking
He's a problem to solve
And in that circle he's making
I will always revolve
And on his sight
These eyes depend
Invisible and indivisible

Chorus:
That fire you ignited
Good bad and undecided
Burned when I stand beside it
Your light is ultraviolet
Visions so insane
They travel unraveling through my brain
Cold when I am denied it
Your light is ultraviolet

Now is a phase and it's changing
It's rotating us all
Thought we were safe but we're dangling
Now it's too far to survive the fall
And this I know
It will not bend
Invisible indivisible

Chorus:
That fire you ignited
Good bad and undecided
Burned when I stand beside it
Your light is ultraviolet
Visions so insane
They travel unraveling through my brain
Cold when I am denied it
Your light is ultraviolet
