

# John Newman, Goodnight Goodbye

[Verse:]

As soon as the doors slammed  
This silence that fell  
Was all that you left me  
With a story to tell  
'Bout cigarettes and ash-trays  
That I smoked with you

[Pre-Chorus:]

I tried to find the truth  
And I ain't there with you  
I never listen, I never listen  
All the things you said  
I'll never hear again  
I should've listened, more

[Chorus:]

You said goodnight  
I know you really meant a goodbye  
We just watched it burn  
Know we could've kept love alive  
I should be loving you  
I should be loving you

[Verse:]

Your makeup on my sheets  
Your clothes on the floor  
The photos that I'll keep  
How we were before  
Before I took you for granted  
Before the memories were torn

[Pre-Chorus:]

I tried to find the truth  
And I ain't there with you  
I never listen, I never listen  
And all the things you said  
I'll never hear again  
I should've listened

[Chorus:]

You said goodnight  
I know you really meant a goodbye  
We just watched it burn  
Know we could've kept love alive  
I should be loving you  
I should be loving you

[Bridge:]

It's time to confess, I've been at my best  
But this time I won't get it wrong  
It's time to confess, I've been at my best  
But this time I won't lead you wrong

[Chorus:]

You said goodnight  
I know you really meant a goodbye  
We just watched it burn  
Know we could've kept love alive  
I should be loving you  
I should be loving you
