Journey, Lifetime Of Dreams

(Schon / Cain / Tribble)

From the first day... I envisioned myself with you It's so hard to wait... But with you it was easy To do Somewhere in time... I knew I would find you here with every Passing moment I see forever so clear Part of me was lost without you You are where I found my faith Feels like love is here to stay...

[Chorus:] When I look in your eyes baby I see a lifetime of dreams come true And I want you to say, that you feel the same Way too The stars in your eyes tell me All my tomorrows will wait for you You're all of my prayers answered My one saving grace is you...

In another life... I believed that I loved you then, If lightning strikes twice, we are destined Together again We don't have to make a promise, we were Always meant to be It's written in the way you look at me... I see

[Chorus]

Love moves at the speed of light Takes years to get it right But we've got till the end of time... I can see... I can see... You and me, forever You're the one woman that can make me stay My one and only saving grace

[Chorus]

I can see... I can see You and me, forever I can see... I can see You and me, forever
