

Journey, Where Did I Lose Your Love

Desperately falling
Feeling our love set us free
We were better together
Believed it was all meant to be
Stay as one forever
The band of gold would always prevail
Happy in the moment
Life betrays one, a fairytale
Memories time cannot erase
I still see your face
Where did I lose your love
You'll always be the question in my heart
How could I make you stay
I still regret the night you walked away
What we shared was not enough
Where did I lose your love
Never saw it coming
You left so suddenly
What was here that scared you
You want what I couldn't see
Emotions time cannot erase
I still see your face
Where did I lose your love
You'll always be the question in my heart
How could I make you stay
I still regret the night you walked away
What we shared was not enough
Where did I lose your love
So far from each other
So close to happiness
I'll be there to remind you
Love forgives but never forgets
Emotions time cannot erase
I still see your face
Where did I lose your love
You'll always be the question in my heart
How could I make you stay
I still regret the night you walked away
How could I make you stay
Where did I lose your love
Still regret the night you walked away
Oh, oh, yeah
