

# Juice WRLD, Lace it (feat. Eminem, Benny Blanco)

Yeah, ayy, mm

Roll it up, lace it, pop a few to chase it  
I'm in my own Matrix, none of this shit makes sense  
All these humans basic, don't got no home trainin'  
Codeine by the cases, I've been purple rainin'  
Roll it up, lace it, pop a few, chase it  
I've been in the Matrix, none of this shit makes sense  
All you humans basic, you ain't even got home trainin'  
Codeine by the cases, I've been purple rainin'

Stressed out, so I tend to take meds (Take meds)  
The Devil told me, "Good show, break a leg" (Break a leg)  
All these painkillers like I got a pair of broken legs (Broken legs)  
All these Percs I pop, you'd thought I was plannin' to break my neck  
Grindin' man, I'm hungry for this shit like I ain't ate yet  
You wish that you could have what I could have, you could just say that  
If you ain't my lil' bitch, then, bitch, them calls, you can save that  
These niggas think they invincible 'til they see them bullet holes in they Maybach

[Juice WRLD (Eminem):]

Roll it up, lace it, pop a few to chase it

Codeine by the cases (Yeah), I've been purple rainin'

[Eminem:]

You pop some ecstasy first, it gets progressively worse  
Try your best to reverse unsuccessfully flirtin' with certain death and revertin' to your promethazine  
The fuckin' devil he lurks, lose your best friend he smirks  
Wake up and everything hurts and as you spiral downward listen  
I know just how it is when  
You start slow then before you notice it now you're mixin'  
Oxy's without prescription  
Cough medicine, valium with 'em but ain't that how addiction  
Sort of works they call it lean 'cause you gravitate and lean towards the perp  
The blessing or the curse of fame 'cause now you can afford the syrup  
Percocet and Percoden but that ain't what you meant when you said that you're in it for the perk's  
Develop a habit out of that  
Need a Xanax now to rap  
So you pop it before you record a verse  
Your buzz wear down  
Like a rabbit out a hat  
Makes you wanna pull your hair out  
Fentanyl, Oxy  
Demerol, dem are all what possibly got Shock G, Roxy  
Codone and lean is probably what got Lil Peep and ODB  
So many who OD be way to young to go see me  
I was lucky my escape was narrow and do  
Not think I take it for granted that I'm still here synthetic heroin you  
Tried to kill me then you murdered Jarad didn't you  
Piece of shit thanks to you now we lost Gangsta Boo and Pimp C, Prince and Michael mixing Nyqu  
With prescription Vic's addiction's like a fucking vicious cycle  
Juice we will forever miss you  
To the younger generation I ain't lecturing you but man just be careful when you

[Juice WRLD:]

I ain't comin' down from this high  
Ain't finna let nobody kill my vibe  
They committed social suicide  
But me? I refuse to die (I refuse to die)  
I will never come down from this high  
I won't let them kill none of my vibes  
They committed social suicide  
Me? I can never ever die, I can never ever die
