

Justin Bieber, Love You Different (ft. BEAM)

I will love you different
Just the way you are
And i will love you different

You pull up in a foreign
You that new York time
Easy Sunday morning
When we touch i think we skip a beat
It's a movie with you
Got me at the Edge

There's a beauty on your lips
I drown with every kiss
I am not used to do this
There;s nothing i won't give
Don;t liek making promises
Just remember this

I will love you different
Just the way you are
And i will love you different

That's what you been looking for
You're the fruit of my life
That patient kind
That tongue got me tongue-tied
And that's why
I will love you different
Just the way you are
