

K Koke, Lay Down Your Weapons (feat. Rita Ora)

Lay down your weapons, weapons for me
That means everything

Listen little manna, done told you ___ the hype ting
I done told you road life aint what it might seem
Where I?m from we do wrong for the right green
But at a price can loose your life for some nice things
No nice dreams, just fiends inside veins
No lie, you don?t wanna hear my scream
Cause cold night got us slippin like an ice rink
My bro light, he got hit up like lightning
My 4 thug killin me, imprisoned with the lifeless
youngen listen, can you vision where my mind is?
this life's sick the end's sorta like ___
Friends turns snitch I know you heard about spider
I recommend you take intelly from me
Cause I?ve been in it from the start dog,
It?s hell in these streets
Once you in it, then you in it, ain?t no settling beat
Lay down your weapons, ___get your money and leave

Lay down your weapons, weapons to me
That means everything
Can we avoid war, search and destroy all
Learn what to live for, if that means anything
Lay down your weapons, weapons for me
if that means anything

you think this life looks fun, well look a little closer
You just might find this life isn?t what you hoped for
___ of life, and the proof?s in the culture
The truth is you die or sit down, no sofa
Prison living is the image you don?t know don
Picture living in this prison and it?s so dark
And when you listen you hear whispers from the cold draft
Looking in the mirror, like a sinner with a broke heart
I know it?s so hard, I hope it won?t last
I know you start and you just wanna get your dough fast
But you don?t wanna end up dead or stuck behind bars
Time is of the essence and the prison flies past
Hearing and die hard kids wanna play with toys
Listen to my voice, can you hear my pain
Before there isn?t choice

Lay down your weapons, weapons to me
That means everything
Can we avoid war, search and destroy all
Learn what to live for, if that means anything
Lay down your weapons, weapons for me
if that means anything
/2x

That means anything...
