Kaiser Chiefs, Heat Dies Down

I can just imagine you and me Running out of steam Going through the motions And I have no idea how you know When I dip my toes In other people's oceans

'Cos you had a local knowledge of the local area
And that impressed me quite
So I tried that night
To do all the things i thought you'd like
But that just made it worse
And I impressed you not
Well not a lot
So we started from the start

When the heat dies down I'll be back in town And until that time I'll be round at mine When the heat dies down I'll be back in town And until that time I'll be round at mine

When the heat dies down When the heat dies down When the heat dies down When the heat dies down

I cannot imagine growing old
To have and to hold
Till death do part each other
'Cos I doubt I could stomach twenty years
Spending time at hers
Talking to that mother

'Cos I got a wider knowledge of the world I just can't face Another argument About the rent It all seems unimportant in the grander scheme of things 'Cause I was purpose built To not feel guilt So we ended at the end

When the heat dies down I'll be back in town And until that time I'll be round at mine When the heat dies down I'll be back in town And until that time I'll be round at mine

When the heat dies down When the heat dies down When the heat dies down When the heat dies down

When the heat dies down When the heat dies down When the heat dies down When the heat dies down
