

Kasia Moś, Addiction

My favorite strong we're gone we'll carry on
Your hand are come
My skin are warm
Your touch brick in my walls
Your mama said You will forget How you make a feel
Want think we know
When we where close

I be waiting for you, baby
My body wants to feel you there
I found the answers to my prays
You give me something I can replace

I can recreate relationship but now it's too complete
Just stay with me caress my dreams I will to lose control
My souls is yours we overdose
Addictions to just me inspire me in hemispheres night of shades of grey

I be waiting for you, baby
My body wants to feel you there
I found the answers to my prays
You give me something I can replace

One more times
I spend ...
Will we found full
