Keane, Time To Go

Now, during a scene Seen it all before We drink, we drink a little much Drink a little more To shake off the nerves and To take off the edge and Now is there any way back home? Seen it all before and I know the signs We drink, drink a little much To stimulate the mind Now it's two hours to go Insult everyone that we know Now its such a long way home Maybe its time to go? Maybe its time we went? Youre making a spectacle Maybe its time we left? I dont wanna spoil your night I dont wanna hurt your pride But maybe its time to go Maybe its time? Now eating from your hand Laugh at every line Soon losing track of you Losing track of time Now its dead on the dancefloor And nobodys laughing anymore Have I become a tiresome bore? Maybe its time to go? Maybe its time we went? Youre making a spectacle Maybe its time we left? I dont wanna spoil your night I dont wanna hurt your pride But maybe its time to go? Maybe its time? To go where theres nowhere to hide From whats broken inside A faultline rips right open Under the wide wide ocean's tide Under the wide wide ocean Maybe its time to go? Maybe its time we went? Youre making a spectacle Maybe its time we left? I dont wanna spoil your night I dont wanna hurt your pride Maybe its time to fly Maybe its time? Maybe its time to go?

Maybe its time?
