

Keri Hilson, I Like

Sun down, friday night, uptown city lights,
here I go start it out, I like,
dressed up out the door so damn ready for,
one night maybe more, I like, I like,
with strobe light hot corse dirty minds,
when you cross my way, I like, I like,
just you and I touch at first sight.

And the world around us won't stop turning to night,
I like, I like.
I'm losing control right now and I feel it's right,
I like, I like.
Were caught in this moment I won't let you go.
And the world around us won't stop turning to night,
I like, I like, I like, I like.

Hey there pure star let's go way to far,
come a little closer, I like,
heart flips up and down, dancing on sleezy ground,
betcha want to get it on, I like, I like,
you've got me down right electrafide,
don't stop the rides, I like, I like,
just you and I,
here and now what a night, I, I, I.

And the world around us won't stop turning to night,
I like, I like.
I'm losing control right now and I feel it's right,
I like, I like.
Were caught in this moment I won't let you go,
And the world around us won't stop turning to night,
I like, I like, I like, I like.

Dance all night don't stop the music,
I like, I can't refuse it.

And the world around us won't stop turning to night,
I like, I like.
I'm losing control right now and I feel it's right,
I like, I like.
Were caught in this moment I won't let you go,
And the world around us won't stop turning to night,
I like, I like, I like, I like, I like...
