

# Kill Paradise, Dreamwork

It must have been like an hour or two  
That I been staring at you  
Such a pretty face one I cannot erase  
I just don't know what to do  
I've never dreamt the dreams I'm dreaming now  
I feel like kissing you  
Pushing back your pretty hair and place it behind your ear  
I'm downtown dreaming with you

(Chorus)

And man I feel like, fell like I can reach the sky oh I  
Just grab you when I know it's right tonight  
And just dance the night away just going with what you say  
And now I don't feel the pressure and now I just need a refresher  
Oh and you, and you, just do what you do  
I'm might of been to shy (shy shy shy.), I'm not that type of guy  
To risk everything it's only the first night (night night night.)  
Or should I do it man I think I'll be alright

And it started in the first grade

What have I become

You can drink your cherry sparkle I'll just drink my rum

Debate if ima take you now

The night is very young

I hope that you had fun

(Chorus)

I can hide for forever your beauty is a treasure

I can hide forever from you
