

King Crimson, People

people fly people flee
people clam and say "it wasn't me";
people fish people beef
people arm to teeth
yes, you've got people on the tube
walking on the moon
people at the bottom of the sea
people in tombs
people in igloos
even a tribe of pygmies

people are the main spring
turning the world around
people, they're the main spring
spinning this world upside down

people sun people toast
people tire shile other people smoke
people bowl people rock
people pay to see two people box

watch me face me
dress me baby me
phone me wire me
house me bug me fire me

people are the main spring
spinning the world around
people, they're the main spring
turning this world inside out
