

Kitty Wells, My Wall Came Tumblin' Down

We built a little wall around the two of us the two of us the two of us
We built a little wall around the two of us but the wall came tumblin' down

I built foundation with love and trust love and trust love and trust
I built foundation with love and trust but the wall came tumblin' down
I've made it even strong with devotion true devotion true devotion true
I've made it even strong with devotion true but my wall came tumblin' down
We built a little wall around...

[ac.guitar]

We made a little home with a little white lie a little white lie a little white lie
We made a little home with a little white lie and the wall came tumblin' down
You made a whole bigger when you told another lie
You told another lie you told another lie
You made a whole bigger when you told another lie and my wall came tumblin' down
We built a little wall around...

[ac.guitar]

Down came the wall when you said goodbye you said goodbye you said goodbye
Down came the wall when you said goodbye yes my wall came tumblin' down

My whole world crumble down to the ground down to the ground down to the ground
My whole world crumble down to the ground my wall come tumblin' down
We built a little wall around...
The wall came tumblin' down the wall came tumblin' down
