

# Kitty Wells, You And Me

You and me together life's a pleasure but without your love life's not complete

And I feel the same about you darling we belong together you and me

We'll share love's joy and life's sorrow you belong to me I belong to you

When you hold my hand the sun shines brighter

When you smile at me I lose my blues

You and me together...

[ steel ]

Don't ever let nothing come between us think our lonely life apart would be

Gossiping tongue can never change me darling

Your love means more than life to me

You and me together...
