## Lacuna Coil, My Wings

Slip out the door and fly I'm lost in time, I hover As an angel, I hover

Embracing all myself I reel
Through the storm that is shaking me
I don't know where
I don't know why
I know I'm not going to fall

And butterflies are flying (fly away) Right beside me As I ascend to the clouds

No, I won't delay No, I won't delay Time is like a knife for me now I just won't delay

Time is mine I got the blade Change your mind I'll make you stay

Butterflies are flying And I just won't delay
