Liam Payne, Cheat Codes, Live Forever

jaded, faded
self-medicated
I didn't know I was waiting for you
broken, smoking
till you came into focus
sobered me up off of one hit of you

wasn't even trying to chase a high
I just didn't wanna feel so low
know I am gonna miss the crazy nights
but you made me wanna let it all go

I was always gonna
live fast, die young
slow down when you came along
burn bright
burn out
but now you make me wanna live forever

all that runnin'
gonna give it up for you
nothing ever get me high like you do
some way, somehow

you and i
gonna life forever
forever
you and i
gonna life forever

wreckless, restless
I let it get so hectic
all the way up whit my head in the sky
too much to gone
too many , too fun
I don't know how but I got out alive

wasn't even trying to chase a high
I just didn't wanna feel so low
know I am gonna miss the crazy nights
but you made me wanna let it all go

I was always gonna
live fast, die young
slow down when you came along
burn bright
burn out
but now you make me wanna live forever

all that runnin'
gonna give it up for you
nothing ever get me high like you do
some way, somehow

you and i
gonna life forever
forever
you and i
gonna life forever
