

# Lianne La Havas, Unstoppable

I'll wait a little longer  
Weren't we a giving stronger?  
I know it's taking the time to heal  
We'll be unstoppable,  
Don't know what I did it for  
I needed to know that it was always real

My head's held high when we walk down the line, my honey  
Arm in arm through the clear night sky.  
Let's be at peace, we'll fly  
Our hearts collide, can't escape from magnetic side.

I was like a satellite spinning away  
Almost lost forever and leaving no trace  
Floating through the darkest preaches of space  
To another galaxy.  
Our polarity shifted around  
Oh, there is nothing else left holding us down  
But it's just gravitational  
We are unstoppable!

I just can't escape the pull  
We are unstoppable  
It's just gravitational,  
We are unstoppable!

The stars will guide the way  
In the dead of space  
You will be my one and only

We are unstoppable /4x
