

# LIZ, That's my man

I am not worried, he'll come  
Just like he always does  
Yeah  
Yeah, that's my man

Countdown, here we go  
Turn this up on your radio  
Blast off, coast to coast  
Where we're going, baby, we don't know  
Freak, freak, free to be  
Anything that I wanna be  
(If we wanna) party, (if we're gonna) party  
Like it's the end of the week (come on)

He is like my match  
He's always on time  
We might not have much  
But I know he's mine  
We love where we're from  
It's like we're stuck in time  
A cold world melts with love  
I'm electrified

And they say boys get to have all the fun  
The cops and robbers stay on the run  
Saving your girl, it's a task so kick his ass  
That's my man

Hello world, it's your girl  
You're talking to a Harlem girl  
Where I'm from, they are often  
Swinging  
Don't get me wrong, there's also love  
Like my boyfriend from above  
The way he loves me, that just leaves me  
Singing

And they say boys get to have all the fun  
The hero's job is never done  
Saving your girl before yourself, caught in your web  
That's my man, yeah

Many boys have made me out of breath  
But yours didn't go away  
And I suppose I figured out how  
He pulls me out, he's an angel
