

# Lonestar, Tequila Talking

I called about that conversation  
That I had with you last night  
It must have been a combination  
Of shooters and neon lights  
And I didn't really mean to say  
I've been losing it since you left  
Yeah, I may have said the words  
But they came from somewhere else

(chorus)

It was just the tequila talking  
When I told you I'm still not over you  
I get a little sentimental  
When I've had one or two  
And that tear in my eye was the salt and the lime  
Not the memory of you walking

If I said I'm still in love with you  
It was just the tequila talking

I don't know what they put in cuervo  
That got me to say those things  
Usually I wouldn't care so much  
Or make such a scene  
But seeing you there in that dress you were wearing  
Just drove me right out of my head  
So don't hold me responsible  
For anything I might have said

(repeat chorus)

If I said I'm still in love with you  
It was just the tequila talking.
