

# Lunarclick, Little Angels

Once you add  
We won't survive  
Twist it around the candle deeper  
Want to survive?  
Twist and turn  
Around your side until you burn  
She wanted to hide  
She pleaded to die  
For every moment was too high  
We wanted to think  
She'd sleep tonight  
We kissed her head  
To dream of little angels  
What you could  
So you would  
Cause you should  
Gonna give up?  
Everything  
Everyone  
All your dreams awakened are done  
Wishing little kitty  
Obviously you are  
Wishing away every inch  
You were once survived  
No need to lie  
Puts me around the mountain  
By your side  
With dreams in your eyes  
You said don't cry  
With dreams in your eyes  
You held me inside  
Existed beside  
Your words never lied  
Between two worlds  
Hope never dies
