## Lykke Li, Gunshot

I am longing for your poison Like a cancer for its prey Shot an arrow, in your harbor Where you waited in the rain I am siren, I am ivy I am no one, I'm nobody I am longing for your honey I am longing for your love

And the shot goes through my head and back Gunshot, I can't take it back

Lay me down in your ocean
Carry me and my burden
I was dreaming about you honey
I was hoping you'd save me

And the shot goes through my head and back Gunshot, I can't take it back My heart cracked, really loved you bad Gunshot, I'll never get you back

And I ache, while you're not here I can feel you aching Wide awake, why you're not here I can feel you firing straight into my heart

Goes through my head and back Gunshot, I can't take it back My heart cracked, really loved you bad Gunshot, I'll never get you back, never get you back Never get you back, never get you back
