

M.I.A., Come Walk With Me

There's a thousand ways to meet you now
There's a thousand ways to track you down
While whatever you said and done
There's a thousand ways to make you count
There's nothing that can touch me now
You can't even break me down
Every time you play this song
It's already been getting down
Can I be your best friend
Can I make it to the end
Can you give me summer when you went and gave them
Come walk with me
You ain't got to shake it, just be with me
You ain't gotta be nice with me
Cause tonight we ain't acting loud we don't care
It's cool, it takes two
Something you still thought could use
It's cool, it takes two
Something you still thought could use
