

Maarja Kivi, A dream

(I wish you'd have your sun with you)
When darkness comes I feel myself like a beast
I try to hide myself away from this dream
I never make it, no it catches me
And in that dream you are so gentle and real
I don't know
If I fall apart or save my breaking heart
How many nights it takes to overcome?
All sunny moments we shared
And how we laughed how we cared
It was so real so special
And after those lonely nights
There will be sun in my sky
I wish you'd have your sun with you
It seems to me you'll never understand
But still I'm reaching out for you till I can
I never make it, you are so cold
And deep inside I feel it's time to go
So tell me
Why did you play with me
Oh, now I really see
That I am strong enough to leave it behind
All sunny moments we shared
And how we laughed how we cared
It was so real so special
And after those lonely nights
There will be sun in my sky
I wish you'd have your sun with you
All sunny moments we shared
And how we laughed how we cared
It was so real so special
And after those lonely nights
There will be sun in my sky
I wish you'd have your sun with you
