

# Machine Head, A Nation On Fire

Well I see, I feel  
On my way  
You close your eyes, scared to think  
You might see  
A world that spends more to kill than to cure  
Living, writhing, diseased, so unpure

It hardens me, the things I see  
But I won't break. it gives me strength

Our suffering. won't always be  
We'll dominate. this nation on fire

The media it  
Blinds out eyes  
A people divided  
And force fed lies  
The black and white societies corrode  
Warring, hating, blind, a rage explodes

So take my hand, across this land  
I won't go down, stand my ground

Our suffering. won't always be  
We'll dominate. this nation on fire

This nation's built on fighting war after war  
And for my brothers, I will fight and stand for  
'Cause I won't break. Your truth is fake  
If blood ran red, you'd leave me for dead  
A nation on fire  
A nation on fire

You tell me peace, well I hear gunshots all night  
The scars I have, I've earned 'cause I've had to fight  
An endless pain, and it won't change  
We just sat, and watched this world die  
A nation on fire  
A nation on fire.
