

Mad Sin, Road To Ruin

Lets Go

drifting through the streets and there's nothing i can do
suffering brutality, fighting for no clue
life seems sad and hopeless, but no one really cares
toxic food and air pollution, future really scares

(chorus)

get yourself together - don't be such a fool
this life is your own life - you're gonna rule
take your chance to realize - the ideas in your head
this sick world we live in - soon it will be dead

life feels like a horror movie, called hell on earth
just turn on the tv news, peace ain't got a worth
daily it's the same, hunger, war and pain
but people react dull, seeing thousand others slain

(chorus X 2)

get yourself together - don't be such a fool
this life is your own life - you're gonna rule
take your chance to realize - the ideas in your head
this sick world we live in - soon it will be dead

life feels like a horror movie, called hell on earth
just turn on the tv news, peace ain't got a worth
daily it's the same, hunger, war and pain
but people react dull, seeing thousand others slain.

(chorus)

get yourself together - don't be such a fool
this life is your own life - you're gonna rule
take your chance to realize - the ideas in your head
this sick world we live in - soon it will be dead
