

# Madonna, Crave (with Swae Lee)

I'm tired of being far away from home  
far from working home  
far from where it's safe  
hope it's not too late  
rush rush rush on you  
love love loved on you  
love you like a fool  
put my trust in you

cause you're the one I crave  
and my cravings get dangerous  
the feelings never fade  
I don't think we should play with this  
say come come give me strength  
I don't think we should wait for this  
cause you're the one I crave  
and my cravings get dangerous

and my cravings get dangerous  
I don't think we should play with this

my cravings get dangerous  
I don't think we should wait

cause I'm just me  
that's all I can be  
something real  
something I can feel  
you know I just can't change  
this is how I'm made  
I'm not afraid  
take me to the place

cause you're the one I crave  
and my cravings get dangerous  
the feelings never fade  
I don't think we should play with this  
say come come give me strength  
I don't think we should wait for this  
cause you're the one I crave  
and my cravings get dangerous

and my cravings get dangerous  
I don't think we should play with this

my cravings get dangerous  
I don't think we should wait

you're on my I don't think you should wait  
you're on me  
one pull up away  
you're down on ride  
ride me like a wave  
I gave you a sensation  
loner days you used to chase  
it's do or die and my love life can't get crazy  
it's on line the girl you're risking everything  
it's overexposed

run so far to try to find the thing  
I lacked and there it was inside me  
ran and ran and ran  
so fast a thing  
to last and there was I hear you breathe

cause you're the one I crave  
and my cravings get dangerous  
the feelings never fade  
I don't think we should play with this  
say come come give me strength  
I don't think we should wait for this  
cause you're the one I crave  
and my cravings get dangerous

and my cravings get dangerous  
I don't think we should play with this

my cravings get dangerous  
I don't think we should wait
