

# Magnum, Breath Of Life

Here we are again, always dream of places  
Near and far, all those different faces  
I'm going to take it like a breath of life

Here we are again, we don't make much difference  
Never start, pray for our forgiveness  
Then we take it like a breath of life

From the wilderness all of us climb  
Just a blink at the end of all time  
Everyday watch the sun on the rise  
Always looking, the moon and the stars in our eyes  
From the wilderness all of us climb  
Just a blink at the end of all time  
Everyday watch the sun on the rise  
Always looking, the moon and the stars in our eyes

So here we are again, like a dream unfolded  
Every star, every theme exploded  
Still we take it like a breath of life

From the wilderness all of us climb  
Just a blink at the end of all time  
Everyday watch the sun on the rise  
Always looking, the moon and the stars in our eyes  
From the wilderness all of us climb  
Just a blink at the end of all time  
Everyday watch the sun on the rise  
Always looking, the moon and the stars in our eyes

Keep burning bright way beyond time  
No shadows light up this long empty night

From the wilderness all of us climb  
Just a blink at the end of all time  
Everyday watch the sun on the rise  
Always looking, the moon and the stars in our eyes  
From the wilderness all of us climb  
Just a blink at the end of all time  
Everyday watch the sun on the rise  
Always looking, the moon and the stars in our eyes
